Projects and Researches

- **Online Job Application System for Sardar Patel University**

  Currently developing in a team of 3 people, an ASP .NET based project named Online Job Application System for Sardar Patel University. This system is being built with the aim to automate and digitalize the conventional job application system of the university.

- An Android + PHP project on **Crime Reporting App**

  As a requirement towards the degree of BCA, developed the Crime reporting app. It is an android based mobile application which can be helpful to report crimes faster than traditional system and is also helpful to send instant auto generated help messages to pre-added contacts. It is also helpful to let our family members or loved ones know about our journey so that they be aware and known if we are in trouble and know our travelling locations history.

- Presentation on **How Google Works**

  As required for the degree of BCA, Presented a mini research on how Google works by explaining Google's bot, Hummingbird algorithm and Google File System.
